

Track, Record and Analyse to improve your vehicle's efficiency

UbiQTrac Fleet Management Solution is a real-time fleet management and tracking solution that gives you the power to remotely track, monitor, manage and interact with your fleet online. UbiQTrac's cost effective solutions allow hands-on control to enhance fleet operations. It provides tangible returns by improving efficiency and productivity, and minimizing service interruptions to improve customer service and increase profits.

Fleet Management and Tracking System

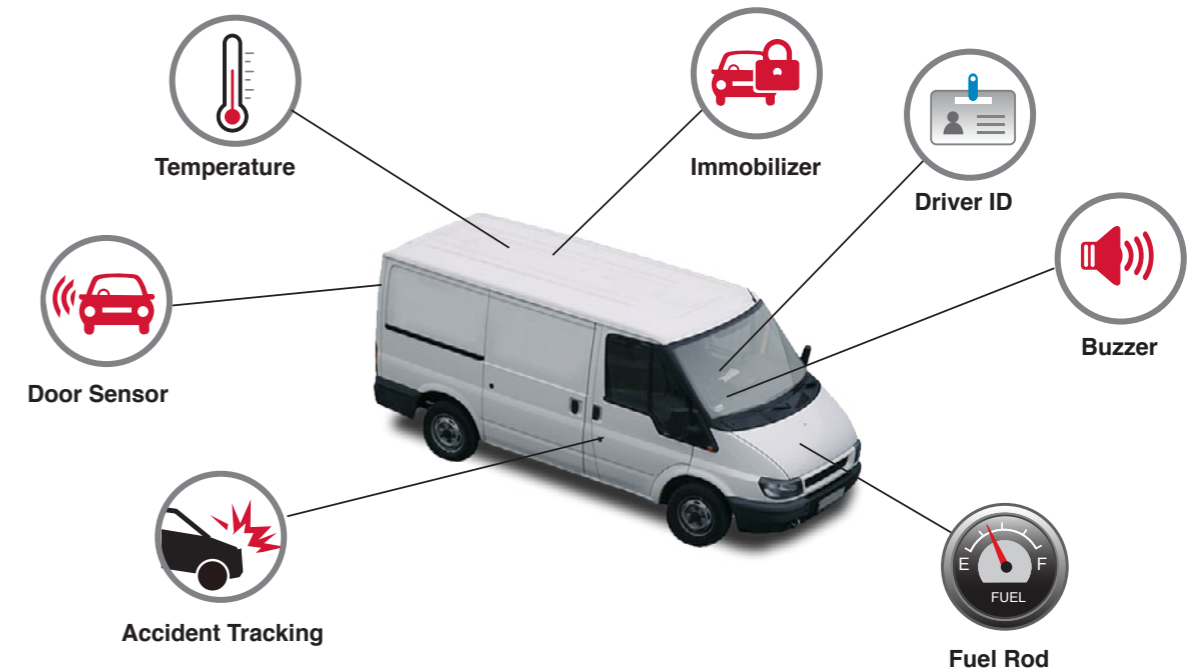

www.ubiqtrac.com.my

Using the latest GPS technology, the solution sends location information over mobile communication networks (GSM/ GPRS) to a secure server for real-time display and analysis reporting of fleet and driver movement. UbiQTrac is built with comprehensive features and user-friendly web-based analytical reports that help reduce operating costs and enhance productivity and security.
